

Consider the potential savings.

Rapid Armour can solve major problems for builders—the loss of time from dealing with damaged fixtures, the loss of money from need for repair and replacement, and the loss of customer good will from unsatisfactory resolution of problems. Here's a look at some specifics.*

The realities of damage.

- 1 in 10 bathtubs are damaged
- 22% of damaged tubs are returned or replaced
- 73% are repaired

The causes of damage.

- 27% of damage is due to shipping
- More than 60% of damage happens on site
- The most common damage is scratching or chipping, followed by cracking and gouging, followed by stains and paint marks

The costs of damage.

- Average cost for return or replacement is \$468
- Average cost of repair is \$267
- Average cost for final clean up of a tub is \$33

Which protective system does your supplier use?

*Data from a survey by NAHB.

Ask your bath and kitchen fixture supplier about this advanced coating today.

At last! Extra-tough protection that saves builders time and money.

**Stands up to rough treatment.
Strips off for a perfect finish.**

Rapid Armour removable protective coating is more effective and efficient than other systems.

Protection that's worry-free.

- Rapid Armour is sprayed on at the manufacturer
- Protects every moment, from shipping to final inspection
- Covers every inch, every curve and contour, with a thick, strong coating
- Offers UV protection during storage
- Does not allow debris to slip between liner and tub to cause scratches or abrasions
- No color transfer

Protection that takes what the trades dish out.

- Rapid Armour is a proprietary polymer-based coating
- Helps prevent damage throughout the construction process
- Factory application means faucet and drain holes are open, avoiding risks of on-site cutting
- Resists impact and helps eliminate scratching and tearing from discarded scraps and debris
- Resists spills of water, paint, stains and solvents. It even withstands the plumber's pressure test

Protection that polishes your image.

- Rapid Armour delivers advantages over other systems
- Makes the construction process more profitable for you and more satisfying for the homeowner
- Coating strips off easily from a single starting point
- Coating can be removed in one piece, to enclose all the trash and debris in the tub in a "heavy duty trash bag"
- Reveals a fixture in perfect showroom condition—with no cleaning required
